PROFESSIONAL SUMMARY

Cyber Forensics undergraduate with a strong foundation in Vulnerability Assessment and Penetration Testing (VAPT), network security, intrusion detection, and web application security. Developed an Intrusion Detection and Prevention System (IDPS) covering port-scan, brute-force, and abnormal-traffic detection as an academic and personal project. Also experienced in full-stack web development using React.js, Node.js/Express, and REST APIs. Strong analytical and problem-solving skills with an ability to research, develop, and document technical projects independently.

CORE COMPETENCIES

Security: Vulnerability Assessment & Penetration Testing (VAPT) Fundamentals, Intrusion Detection & Prevention, Network Security Fundamentals, Web Application Security Fundamentals, Digital Forensics Fundamentals, Cyber Security Fundamentals

Programming: Python, JavaScript

Web Development: HTML5, CSS3, React.js, JSX, REST APIs, Node.js/Express, Responsive Web Design

Tools & Platforms: Git, GitHub, VS Code, VirtualBox, MongoDB, Vercel, Render, Cloudinary

PROJECTS

Intrusion Detection and Prevention System (IDPS) – SentinelX

- Developed an IDPS to monitor network activity and identify suspicious behavior in real time.
- Implemented detection logic for network threats including port scanning, brute-force activity, and abnormal network traffic patterns.
- Built a web-based monitoring dashboard to display security alerts and network activity.
- Worked with Python-based detection components and a Node.js/Express backend; integrated MongoDB for storing security alerts and event data.
- Explored automated prevention concepts such as blocking suspicious IP addresses.

Web Chat Application – ChatVerse

- Developed a full-stack real-time chat application using React.js (frontend) and Node.js/Express.js (backend).
- Implemented messaging, reactions, file sharing, search, and user interaction features.
- Managed source control and deployment workflows using Git/GitHub.

Web Application / E-Commerce Website

- Built a responsive web application using HTML, CSS, JavaScript, and React.js with product and user management functionality.
- Integrated REST APIs and applied responsive design principles for user-focused interfaces.
- Deployed and version-controlled the project using Vercel and Git/GitHub.

Video Uploading Platform – Anivortex

- Developed a web application for uploading and managing video content with cloud-based media management.
- Integrated frontend interfaces with backend APIs for content handling.

Personal Portfolio

- Designed and developed a responsive personal portfolio website to showcase technical projects and skills.

INTERNSHIP EXPERIENCE

React.js Development Intern

1 Month

Techwingsys

- Developed the frontend of an e-commerce web application using React.js.

- Worked with REST APIs for product and user management functionality.
- Built responsive, user-focused web interfaces and collaborated using GitHub for version control.
- Deployed application builds using Vercel; gained practical experience in modern frontend development workflows.

EDUCATION

BSc Honours in Cyber Forensics

Expected Graduation: 2028

Kristu Jyothi College of Management and Technology, MG University

- Focus areas: Cyber Security, Cyber Forensics, Web Development.

CERTIFICATIONS

- React.js Internship Certification – Techwingsys
- MS Office Certification – Bharat Sevak Samaj
- NASA Space Apps Challenge – Participation Certification
- AURORE Inter-College Hackathon – 2nd Prize

ACHIEVEMENTS

- Won 2nd Prize in the AURORE Inter-College Hackathon conducted by Assumption College.
- Participated in the NASA Space Apps Challenge.
- Participated in multiple hackathons and technology-related activities.

ADDITIONAL INFORMATION

Soft Skills: Teamwork, Communication, Adaptability, Time Management, Problem Solving

Languages: English, Malayalam
